

Impala Canada is the owner and operator of the Lac des Iles Mine, located 90 minutes northwest of Thunder Bay, Ontario. In operation for 30 years, the LDI Mine is one of only two known pure palladium sources in North America. Palladium contributes to a cleaner global environment, with its leading use in catalytic converters that reduce harmful emissions from gas-powered and hybrid vehicles.

The LDI Mine features a unique, ore body and modern infrastructure, including underground and surface mining and milling operations. The LDI Mine is in Robinson-Superior Treaty territory, and the land on which we operate is the traditional territory of the Anishinaabeg and the Métis. As a responsible neighbor in the Thunder Bay region, Impala Canada actively partners with local organizations, programs and events focused on healthcare, education and community development to help enhance the quality of life for all.
