

DFIN Announces Title Sponsorship for Upcoming RegTech Data Summit in New York City

April 16, 2019

Technology leaders to discuss enterprise digitization, reporting modernization, open data standards in today's rapidly-evolving industry

NEW YORK--(BUSINESS WIRE)-- [Donnelley Financial Solutions](#) (NYSE: DFIN), a leading global risk and compliance company, announced its title sponsorship of the Data Coalition's second annual RegTech Data Summit on April 23 in New York City.

As U.S. regulatory compliance and reporting standards rapidly move from document-based disclosure to high-quality standardized open data, financial regulators, regtech experts, academics and open data advocates will discuss the latest innovations and what the future will hold for the industry.

"As technology advances and data analysis becomes more and more sophisticated, it's important to ensure companies are still compliant in the eyes of U.S. regulatory agencies," said Craig Clay, president, Global Capital Markets at DFIN. "The push and pull of data transparency and the methods in which disclosures are being made are evolving quickly, but DFIN strives to stay ahead of the curve, to counsel our clients on best practices and ensure they're not only compliant – but confident in growing their businesses."

Three technologies today, each with a unique angle, are transforming the way companies analyze and report data: RegTech, new technologies to meet regulatory and compliance requirements effectively; SupTech, which uses these technologies to tackle supervisory requirements; and artificial intelligence, that allows companies to use machine learning to sort, analyze and effectively use data to drive business decisions. These transformative technologies, are driving reporting modernization forward.

"In today's world, strategically implementing technologies at the right time is invaluable for a business' growth. AI tools change the way vast quantities of data are analyzed and reported, more effectively than ever before," said Ned Gannon, president, eBrevia. "Effective leadership, paired with compelling data that's extracted and analyzed by powerful AI technology tools can truly transform a business."

DFIN partners with public and private companies, as well as government agencies, to prepare for transformation within the regulatory and compliance industry with best-in-class financial disclosure technology and AI solutions designed to deliver streamlined, high-quality data for enhanced analytics.
