Forward-looking Statements

This presentation, and other statements that BlackRock may make, may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act, with respect to BlackRock's future financial or business performance, strategies or expectations. Forward looking statements are typically identified by words or phrases such as "trend," "potential," "opportunity," "pipeline," "believe," "comfortable," "expect," "anticipate," "current," "intention," "estimate," "position," "assume," "outlook," "continue," "remain," "maintain," "sustain," "seek," "achieve," and similar expressions, or future or conditional verbs such as "will," "would," "should," "could," "may" and similar expression.

BlackRock cautions that forward-looking statements are subject to numerous assumptions, risks and uncertainties, which change over time. Forward-looking statements speak only as of the date they are made, and BlackRock assumes no duty to, and does not undertake to, update forward-looking statements. Actual results could differ materially from those anticipated in forward-looking statements and future results could differ materially from historical performance.

BlackRock has previously disclosed risk factors in its Securities and Exchange Commission ("SEC") reports. These risk factors and those identified elsewhere in this report, among others, could cause actual results to differ materially from forward-looking statements or historical performance and include: (1) the introduction, withdrawal, success and timing of business initiatives and strategies; (2) changes and volatility in political, economic or industry conditions, the interest rate environment, foreign exchange rates or financial and capital markets, which could result in changes in demand for products or services or in the value of assets under management ("AUM"); (3) the relative and absolute investment performance of BlackRock's investment products; (4) BlackRock's ability to develop new products and services that address client preferences; (5) the impact of increased competition; (6) the impact of future acquisitions or divestitures; (7) BlackRock's ability to integrate acquired businesses successfully; (8) the unfavorable resolution of legal proceedings; (9) the extent and timing of any share repurchases; (10) the impact, extent and timing of technological changes and the adequacy of intellectual property, data, information and cybersecurity protection; (11) attempts to circumvent BlackRock's operational control environment or the potential for human error in connection with BlackRock's operational systems; (12) the impact of legislative and regulatory actions and reforms, regulatory, supervisory or enforcement actions of government agencies and governmental scrutiny relating to BlackRock; (13) changes in law and policy and uncertainty pending any such changes; (14) any failure to effectively manage conflicts of interest; (15) damage to BlackRock's reputation; (16) geopolitical unrest or terrorist activities, civil or international hostilities, including the war between Russia and Ukraine, and natural disasters, which may adversely affect the general economy, domestic and local financial and capital markets, specific industries or BlackRock; (17) a pandemic or health crisis, and related impact on BlackRock's business, operations and financial condition; (18) climate-related risks to BlackRock's business, products, operations and clients; (19) the ability to attract, train and retain highly qualified and diverse professionals; (20) fluctuations in the carrying value of BlackRock's economic investments; (21) the impact of changes to tax legislation, including income, payroll and transaction taxes, and taxation on products or transactions, which could affect the value proposition to clients and, generally, the tax position of the Company; (22) the impact of success in negotiating distribution arrangements and maintaining distribution channels for its products; (23) the failure by key third-party providers of BlackRock to fulfill their obligations to the Company; (24) operational, technological and regulatory risks associated with BlackRock's major technology partnerships; (25) any disruption to the operations of third parties whose functions are integral to BlackRock's exchange-traded funds ("ETFs") platform; (26) the impact of BlackRock electing to provide support to its products from time to time and any potential liabilities related to securities lending or other indemnification obligations; and (27) the impact of problems, instability or failure of other financial institutions or the failure or negative performance of products offered by other financial institutions.

BlackRock's Annual Report on Form 10-K and BlackRock's subsequent filings with the SEC, accessible on the SEC's website at www.sec.gov, and on BlackRock's website at www.blackrock.com, discuss these factors in more detail and identify additional factors that can affect forward-looking statements. The information contained on the Company's website is not a part of this presentation, and therefore, is not incorporated herein by reference. BlackRock reports its financial results in accordance with accounting principles generally accepted in the United States ("GAAP"); however, management believes evaluating the Company's ongoing operating results may be enhanced if investors have additional non-GAAP financial measures. Management reviews non-GAAP financial measures to assess ongoing operations and considers them to be helpful, for both management and investors, in evaluating BlackRock's financial performance over time. Management also uses non-GAAP financial measures as a benchmark to compare its performance with other companies and to enhance the comparability of this information for the reporting periods presented. Non-GAAP financial measures may be limited because they do not include all of BlackRock's revenue and expense. BlackRock's management does not advocate that investors consider such non-GAAP financial measures in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. Non-GAAP measures may not be comparable to other similarly titled measures of other companies.

This presentation also includes non-GAAP financial measures. You can find our presentations on the most directly comparable GAAP financial measures calculated in accordance with GAAP and our reconciliations in the appendix to this presentation, as well as BlackRock's other periodic reports which are available on BlackRock's website at www.blackrock.com. The information provided on our website is not part of this presentation, and therefore, is not incorporated herein by reference.

Important Notes

As indicated in this presentation, certain financial information for 2012 to 2015 reflects accounting guidance prior to the adoption of the new revenue recognition standard. For further information, refer to Note 2, Significant Accounting Policies, in the consolidated financial statements in our 2018 Form 10-K. Beginning in the first quarter of 2022, BlackRock updated its definitions of operating income, as adjusted, operating margin, as adjusted, and net income attributable to BlackRock, Inc., as adjusted. Information from 2018–2022 reflects the updated definitions. Information for 2012–2017 does not reflect the updated definitions.

Please note this presentation includes footnotes. For footnoted information, including end notes regarding non-GAAP and other relevant information and reconciliation to GAAP, please open the full presentation PDF on BlackRock's website at www.blackrock.com.
Strategy: Delivering platforms for performance to clients
Our strategy is serving clients with excellence

Who we serve¹

- Wealth management
- Pension plans
- Insurance companies
- Governments & official institutions
- Asset managers
- Corporate treasurers
- Foundations, endowments & family offices

$9.1T
“Units of Trust”

How we serve them

40 million
People using iShares ETFs²

>$50 billion
Invested across private markets in last two years³

35 million
Americans with retirement assets managed by BLK⁴

130,000+
Aladdin users⁵

1,300+
ETFs offered with 85+ new ETFs launched in 2022⁶

400+
Leading insurers rely on our product and services⁷

Note: For footnoted information, refer to slide 10.
We are a platform for performance

Delivering strong investment performance

Providing scale across asset management & technology

Translating our efficiency to savings for our clients

81% Active AUM above peer median or benchmark for 5-yr period¹

9,000 Private markets deals reviewed in 2022³

25% Savings in fixed income execution costs vs. market average⁵

$600M Saved for iShares investors through fee reductions since 2015⁶

165 4- and 5-star active funds²

3,000 Risk factors monitored by Aladdin⁴

Note: For footnoted information, refer to slide 10. Past performance is not indicative of future results.
BlackRock’s “cloud–like” platforms fuel value for clients

Trends with asset owners match industrial change driving “on–prem” to “cloud”

- Access innovation & scale
- Faster deployment
- Cost restructuring & efficiencies
- Improve business agility
- Enhance resilience
- Positive network effects

One BlackRock – Platform Use Cases

- **iShares**
  - EM exposures instantly access 24 countries\(^1\)
  - Derivatives replacement, reduce collateral management costs

- **Institutional Outsourcing**
  - Use scale of BLK trading, research, portfolio management & investment servicing
  - Cost variabilization & efficiency

- **Model Portfolios**
  - Models–based advisors grow faster (vs. rep as PM, brokerage)
  - Reduce costs of maintaining in–house CIO staff

- **Aladdin**
  - Move to unified tech stack
  - Positive network effects
  - Opportunity for client margin premium

Cloud computing spend to grow ~1.5x vs. traditional IT from 2019 to 2025E

End notes

These notes refer to the financial metrics and/or defined term presented on:

Slide 4 – Our strategy is serving clients with excellence
2. Data as of 12/31/2022. Source: Broadridge, ExtraETF, AMF, Le Monde, Wisdom Tree, Finanzas, Italian Association of Asset Managers. The 40 million figure estimates the number of individual investors in iShares ETFs from platform data across United States, European Union, United Kingdom, Canada, and Japan from the aforementioned sources. U.S. iShares investors estimated based on an empirical analysis of aggregate brokerage accounts in the U.S. that hold iShares ETFs at the ticker level, and BlackRock estimates.
3. Refers to capital deployed from 1/1/2021 to 12/31/2022 in private markets strategies.
4. Data as of 12/31/2021. The overall number of Americans is calculated based on estimates of participants in BlackRock’s Defined Contribution (DC) and Defined Benefit (DB) plan clients. The Defined Contribution number is estimated based on data from FERS as well as BrightScope for active participants across 401(k) and 403(b). Defined Contribution includes plans with over $100M+ in assets where participants have access to one or more BlackRock funds; some may not be invested with BlackRock. The Defined Benefit number is estimated based on data from public filings and Pension & Investments for the total number of participants across the 20 largest U.S. Defined Benefit plans that are not also Defined Contribution clients of BlackRock.
5. Data as of May 2023.

Slide 5 – We are a platform for performance
2. Source: Morningstar Fund data as of 3/31/2023. Includes all BLK global active mutual funds (385 total). % AUM is calculated out of BLK funds that have any star rating, and does not include the AUM of non-rated funds as of 3/31/2023. Morningstar rates funds from one to five stars based on how well they’ve performed (after adjusting for risk) in comparison to similar funds. Within each Morningstar Category, the top 10% of funds receive five stars, the next 22.5% four stars, the middle 35% three stars, the next 22.5% two stars, and the bottom 10% receive one star. Funds are rated for up to three time periods—three–, five–, and 10 years—and these ratings are combined to produce an overall rating. Funds with less than three years of history are not rated. Ratings are objective, based entirely on a mathematical evaluation of past performance. They’re a useful tool for identifying funds worthy of further research, but shouldn’t be considered buy or sell recommendations.
5. Source: BlackRock analysis of all Fixed Income High Yield and Investment Grade Credit, FX, and Equity trades excluding derivatives for 2022 as of 12/31/2022. BlackRock Execution Cost is the average difference between the actual price achieved on the trade and the benchmark price. For Equity and FX, benchmark price is the market price, based on exchange data at the time when the PM submitted the order. For Fixed Income, benchmark price is the previous day’s closing price. The Market Half Spread (or Expected Cost) is an estimate of the average execution cost of a market participant. For Fixed Income, Market Half Spread is estimated quarterly for each sector and maturity bucket based on a consensus opinion of BlackRock traders as well as a set of over 10 broker dealers. For FX, brokers provide Market Half Spread quarterly on a consensus basis for each currency pair and size range. For Equity, BlackRock calculates Market Expected Cost using an average of multiple independent broker models. Subject to change.
6. BlackRock as of December 2022. Cumulative cost–savings figure is calculated by taking the difference between the previous fund expense ratio and the new fund expense ratio from 2015 through December 2022, multiplied by the fund assets under management at the time of the fund reduction. Methodology does not account for compounding savings over time.
End notes

These notes refer to the financial metrics and/or defined term presented on:

Slide 6 – BlackRock’s “cloud-like” platforms fuel value for clients
1. iShares exposures accounted for coming from total countries listed in MSCI EM Index as of May 2023. MSCI EM Index accounts for large and mid-cap representation across 24 emerging markets (EM) countries.
2. Source: Gartner.

Slide 7 – Our strategy continues to deliver
1. Represent last three years ending 3/31/2023. Mega mandates reflect client outsourcing assignments greater than $5 billion in assets.
3. BLK Form 10-Ks for respective years. 3–year CAGR represents 12/31/2019 to 12/31/2022.

Slide 9 – Asset management revenue remains highly fragmented
2. Source: Dealogic. Investment banking revenue with data for year ending 12/31/2022.
Platform as a Service
We are a platform for scale...
The only “Platform as a Service” (PaaS) in asset management

- Enables clients to grow and expand over time while remaining within the BlackRock Ecosystem
- Combining the “pieces of the puzzle” enables unique product innovation
- Aladdin – the “language of portfolios” – as the core foundation provides operating leverage

</table>

Note: For footnoted information, refer to slide 20.
The PaaS value proposition is resonating with clients more and more

- Asset managers have historically been designed around their skills as opposed to the needs of the client.
- No firm has been able to offer the “whole portfolio”.
- Individual relationships with several providers are expensive from a client perspective.

Our platform goal is to make it “better, faster, and cheaper” for the client to expand within the BLK ecosystem.

68% of our 25 largest clients have increased their BLK wallet share in the last five years.

~20 outsourcing mega mandates won by BLK since 2019

End notes

These notes refer to the financial metrics and/or defined term presented on:

Slide 31 – BlackRock’s Aladdin® technology solves for key aspects of the investment process
1. Technology services revenue per BLK 2022 Form 10–K filing. Revenue as of 12/31/2022.
2. BLK Form 10–K filings for respective years. 3-year CAGR represents 2019–2022.
3. Client retention represents annual contract value ‘ACV’ at the beginning of the year less client attrition during the year, divided by ACV at the beginning of the year. ACV represents forward-looking recurring subscription fees under client contracts for the next twelve months at the end of a respective quarter, assuming all client contracts that come up for renewal are renewed. ACV excludes nonrecurring fees such as implementation and consulting fees. Management believes ACV is an effective metric for reviewing BlackRock’s technology services’ ongoing contribution to its operating results and provides comparability of this information among reporting periods while also providing a useful supplemental metric for both management and investors of BlackRock’s growth in technology services revenue over time, as it is linked to the net new business in technology services. ACV represents forward-looking, annualized estimated value of the recurring subscription fees under client contracts, assuming all client contracts that come up for renewal are renewed, unless we received a notice of termination, even though such notice may not be effective until a later date. ACV also includes the annualized estimated value of new sales, for existing and new clients, when we execute client contracts, even though the recurring fees may not be effective until a later date and excludes nonrecurring fees such as implementation and consulting fees.

Slide 36 – Creating a platform with 3rd party partners
1. Subject to customary regulatory and closing conditions. Minority investment in Avaloq expected to close in 2Q 2023.

Slide 37 – Aladdin® is a high-quality, fast-growing technology business that fuels BlackRock’s growth
1. BLK Form 10–K filings for the period 2018–2022.
2. ACV represents forward-looking recurring subscription fees under client contracts for the next twelve months at the end of a respective quarter, assuming all client contracts that come up for renewal are renewed. ACV excludes nonrecurring fees such as implementation and consulting fees. See note on slide 37 for more information on ACV.
3. Represents CAGR for 2019–2022. See note on slide 37 for more information on ACV.
4. Large clients represent new mandates over $1 million annual subscription revenues signed in 2022.

iShares generated high single-digit organic revenue growth, driven by strategic product segments

iShares ETF product segments:

**Strategic ETF segments**
- Enabling clients to efficiently access:
  - An expanding universe of Fixed Income exposures
  - Sources of return from active risk benchmarks (Factor, Sustainable/Transition, Thematic)

**Core equity ETFs**
- Serves buy-and-hold clients with low cost ETFs
- Grows assets and revenues

**Precision ETFs**
- Targeted, liquid exposures for tactical allocators
- Market-driven growth

Note: For footnoted information, refer to slide 54.
iShares generated over $1.1 billion in organic revenue growth, more than the next three ETF issuers combined.

3 year organic revenue growth ($M)$^1$

- ETF Issuer #6: $279 (Index)
- ETF Issuer #5: $296 (Index)
- ETF Issuer #4: $314 (Leveraged)
- ETF Issuer #3: $318 (Active)
- ETF Issuer #2: $462 (Index)

- iShares: $1,108 (Strategic ETF segments: Fixed Income, Factor, Sustainable/Transition, Thematic)

Note: For footnoted information, refer to slide 54.
We expect the ETF industry to grow to $25T of AUM by 2030

Industry trends driving ETF adoption

**Digital wealth:** $17T market growing 15% as ETFs become the preferred vehicle

**Model portfolios:** $4.2T market growing 16% with ETFs expanding share in wealth

**Fixed income:** ETFs modernizing the bond market with more clients seeking efficiency

**Technology:** ETFs unlocking access to an expanding world of active & index investing

ETFs still a small % of global capital markets

Projected ETF industry AUM ($T)

- **2018:** $5T
- **2023:** $10T
- **2025P:** $15T
- **2030P:** $25T

BlackRock’s investment “engine” delivers performance and customization at scale and innovative access to new markets

**BlackRock’s ETF & Index Investing “engine”**

**Our investment “engine” enables performance and customization at scale**

- **ETF technology** access to more investments
  - >1,000 benchmarks tracked across countries, sectors & asset classes

- **Custom / direct** indexing, active risk, voting choice
  - Custom/direct indexing: ~$150B
  - Active risk benchmarks: $1.1T
  - Voting choice: $2.2T

- **Leading ETF quality & tracking performance**
  - Exchange bid–ask spreads are half the industry average in Europe & the U.S.

- **Algos & automation** across trading processes
  - Systems–driven, rules–based approach enables scale & customization

- **Shift** to multiple ETF servicers & providers
  - Adds scale, diversification & increased operating leverage for BlackRock

**Our platform enables innovative access to new markets and growth opportunities**

- **ETF technology** for active & outcome strategies
- **Expansion of custom / direct** indexing & active risk
- **Tokenization** as a new investment wrapper
- **More efficient access to digital & alternatives**
- **Market modernization & ETF on–ramps**

Note: For footnoted information, refer to slide 55.
ETF & Index Investing at BlackRock is a scale growth platform to access an expanding world of investments

A differentiated ETF & Index business

- Efficient access for tens of millions of people
- Breadth of high quality investments
- Leading organic revenue growth, driven by strategic segments

Multiple trillion-dollar growth opportunities

- Triple ETF assets in digital wealth worldwide
- Generate a majority of ETF flows through managed models
- Triple fixed income ETF assets by unlocking client use cases

Scale investment “engine” enabling innovation

- Leading performance & customization at scale
- Diversity of service providers & operating leverage
- Innovative access to new markets and investments
End notes

These notes refer to the financial metrics and/or defined term presented on:

**Slide 43 – ETF & Index Investing at BlackRock is a scale growth platform**
4. Source: BlackRock, as of March 31, 2023. Organic revenue growth rate calculated by dividing net new base fees (NNBF) earned on net new business (NNB) by the base fee run–rate at the beginning of period and averaging annual growth rates over the thirty–six month period.
5. Revenue includes base fees and from securities lending revenue.

**Slide 44 – BlackRock’s ETF & Index Investing platform is differentiated**
1. The nearly 40 million figure estimates the number of individual investors that are using iShares ETFs. Sources:
   - United States: Sources: Broadridge Financial Solutions, as of March 31, 2023. BlackRock estimate, as of March 31, 2023. Approximately 33 million people use iShares based on a ticker–level analysis of unique, anonymized individual brokerage account numbers that hold at least one iShares ETF and have an account balance greater than $0.
   - Europe: Sources: ExtraETF, as of March 2022: “2026 ETF Savings Plans Market: How Retail Investors Invest in ETFs.” BlackRock estimate, as of March 31, 2023. Approximately 50% of iShares clients in Europe invest in iShares ETFs through savings plans.

**Slide 45 – iShares generated high single–digit organic revenue growth, driven by strategic product segments**
2. Source: BlackRock, as of March 31, 2023. Effective fee rate represents the annualized effective fee rate, defined as run–rate base fees: individual product NAVs multiplied by individual product TER, aggregated and divided by total segment assets under management.
5. Source: BlackRock, as of March 31, 2023. Three year organic revenue growth rate calculated by dividing net new base fees earned on net asset inflows by the base fee run–rate at the beginning of period and averaging over the three year period.

**Slide 46 – iShares generated over $1.1 billion in organic revenue growth, more than the next three ETF issuers combined**

**Slide 47 – We expect the ETF industry to grow to $25T of AUM by 2030**
2. Sources: Broadridge Global Advisory Services, as of May 31, 2023: “U.S. advisor sold asset management: this time it’s personal”. BlackRock, as of March 31, 2023: “A Model Moment for Asset Managers”. Managed model portfolio market sizing includes both ETF and non–ETF allocations within managed models.
4. Source: BlackRock, as of March 31, 2023. Estimates include 2025 and 2030 scenario calculations based on proprietary research. Subject to change. The figures are for illustrative purposes only and there is no guarantee the projections will come to pass.

**Slide 48 – BlackRock’s platform improves clients’ access to investments and unlocks multiple trillion–dollar growth opportunities**
1. 2030 represents target. Multi–trillion dollar growth opportunities described are for illustrative purposes only and are subject to change. There is no guarantee the figures will occur in the time periods described.
End notes

These notes refer to the financial metrics and/or defined term presented on:

Slide 49 – Increase investment access for tens of millions of people by making iShares central on digital wealth platforms

1. Source: BlackRock, as of March 31, 2023. 2027T and 2030T are targets. Estimates include 2027 and 2030 scenario calculations based on proprietary research. Growth opportunities described are for illustrative purposes only and are subject to change. There is no guarantee the figures will occur in the time periods described.

Slide 50 – Enable wealth and asset manager CIOs to build and customize managed models with iShares and BlackRock ETFs

1. Third-party flows include wealth models, including advisor–driven models created by financial advisors, e.g., Rep as PM and RIAs and home office models created by centralized, in–house investment teams at wealth managers. Third–party flows also include models managed by other asset managers that distribute models through wealth managers. Source: BlackRock, iShares Global Business Intelligence, as of March 31, 2023.

3. Source: BlackRock, Aperio, as of March 31, 2023. ~$150B in custom/direct indexing includes AUM managed in index equity SMAs by Aperio for wealth management clients and in custom/direct indexing mandates. All client transitions to custom/direct indexing have been funded.

3. Source: BlackRock, as of March 31, 2023. $1.1T of ETFs managed against active risk benchmarks include: factor–based investment strategies that target specific drivers of return (growth, value, momentum, and minimum volatility indexes); sustainable strategies that encompass exclusionary screens, optimization or various metrics that tilt toward a client’s unique ESG objective; thematic benchmarks that aim to capture long–term secular trends; capped indexes that include modified market cap–weighted, optimized country or optimized sector benchmarks; additional indexes with alt–weighted methodologies (e.g., equal–weighted).

4. Source: BlackRock, Aperio, as of March 31, 2023. $2.2T includes client funds participating in BlackRock Voting Choice. Assets include index equity assets held in multi–asset fund of funds strategies. Certain institutional pooled funds that implement Systematic Active Equity (SAE) strategies are also eligible for BlackRock Voting Choice but are not displayed in the chart. Eligible SAE institutional pooled funds and separate accounts amount to $102B in eligible Voting Choice assets.

5. Source: BlackRock, as of March 31, 2023. Exchange bid–ask spreads defined as ETF trading costs as compared to the industry average in both Europe and the United States.

Slide 51 – Modernize the bond market by unlocking client use cases for fixed income ETFs to generate returns more efficiently

% of each RIA firm assets

- **Difficult to reach** (UHNW, Illiquids): 26%
- **Whole portfolio expanded reach** (with Aperio, Munis, tax): 38% +
- **Current CMS reach**: 36%

Note: For footnoted information, refer to slide 76.
We win in whole portfolios by managing complexity for our clients, leveraging our technology to scale

- **Manager research**
- **Investment tools**
- **Models infrastructure**
- **Client reporting**

**Scalable**
Strategic, robust, performant solutions

**Flexible**
Easily extendable and designed for varying client use-cases

**Integrated**
Scaled across our Aladdin platform
Combining our investment solutions with asset allocation expertise to deliver investment outcomes for clients

World-class investment building blocks designed to meet evolving client needs

Portfolio construction & asset allocation expertise

- Active Equities
- Active Fixed Income
- Multi-Asset
- Private Markets
- iShares & Index
- Cash Management
Well positioned to meet evolving client demand for active over the long–term

Delivering traditional active strategies through whole portfolios

Unlocking new markets to deliver alpha in innovative ways for clients

Effectively managing complexity and delivering alpha at scale through technology

Ability to generate durable alpha for clients and differentiated organic asset and base fee growth for shareholders over the long–term
End notes

These notes refer to the financial metrics and/or defined term presented on:

Slide 65 – BlackRock active strategies
1. AUM as of 3/31/23.
2. Represents last three years ending 3/31/23. Net new business represents net asset inflows and Net new base fees represents net new base fees earned on net asset inflows.
3. Represents last three years ending 3/31/23. Organic asset growth rate calculated by dividing net asset inflows over beginning of period assets.
4. Represents last three years ending 3/31/23. Organic base fee growth rate calculated by dividing net new base fees earned on net asset inflows by the base fee run-rate at the beginning of period.
5. Revenue includes base, securities lending and performance fees.
6. 3-year CAGR represents compounded annual growth rate for the three years ending 2022.

Slide 66 – BlackRock is growing faster than the industry, and has significant room to grow share
1. Source: Simfund for U.S. MFs, Broadridge for non-U.S. MFs and Institutional, Bloomberg for ETFs, HFR for Hedge Funds and Preqin for Illiquid Alts. BlackRock 1Q23 organic growth is annualized.

Slide 67 – Strong relative performance across active platform
2. Source: Morningstar Fund data as of 3/31/2023. Includes all BLK global active mutual funds. % AUM is calculated out of BLK funds that have any star rating, and does not include the AUM of non-rated funds as of 3/31/2023. Morningstar rates funds from one to five stars based on how well they've performed (after adjusting for risk) in comparison to similar funds. Within each Morningstar Category, the top 10% of funds receive five stars, the next 22.5% four stars, the middle 35% three stars, the next 22.5% two stars, and the bottom 10% receive one star. Funds are rated for up to three time periods—three-, five-, and 10-years—and these ratings are combined to produce an overall rating. Funds with less than three years of history are not rated. Ratings are objective, based entirely on a mathematical evaluation of past performance. They’re a useful tool for identifying funds worthy of further research, but shouldn’t be considered buy or sell recommendations.

Slide 68 – BlackRock’s whole portfolio business is delivering outcomes for clients, and unlocking new channels for delivering active
1. AUM in BlackRock managed models is primarily captured in BlackRock ETF and Retail AUM; underlying assets are in BlackRock ETFs and mutual funds.

Slide 69 – Accelerating demand for whole portfolio solutions and model portfolios
1. Sources: Cerulli for Wealth SMAs, as of Q2 2022; P&I for OCIO, as of Q1 2022. Excludes Affiliated Wealth Solutions due to lack of data availability.

Slide 70 – BlackRock model growth outpacing the industry, with additional channels to drive growth

Slide 72 – Expanding custom model offerings to grow share with RIA clients
1. Source: Cerulli; BlackRock estimates.

A historic evolution of the capital stack and return opportunities in Fixed Income...

The size of capital markets generally resembles a funnel, until you get to the large equity base.

But for over 2 decades now, investors have been rewarded for taking on more volatility as the returns have very much been concentrated down towards the bottom (the deep end of the pool).

And of course, that makes sense as at pretty much any time over the last 15 years, the Yield profile looked something like this...

But today, it's a very different picture in which more risk does not necessarily equate to higher reward...

Note: For footnoted information, refer to slide 87. Index definitions are found on slide 88. Index returns are shown for illustrative purposes only. It is not possible to invest directly in an index. Past performance is not indicative of future results.
... and as opposed to the past 10 years, returns come with dispersion and volatility making active management of these yields a valuable part of a total Fixed Income allocation...

The range of yields available across major Fixed Income asset classes has more than doubled in the last 18 months alone

The HY Index, with 2011 members, is an incredible illustration of how an index average cannot fully describe the dispersion (and opportunity) within

Half the index trades below 300 or above 800...

...while the index trades at 460bps (along with 5% of the constituents)

Across 10 major global Fixed Income asset classes, owning the best returning asset and selling the worst has created increasingly large alpha – in 2019, there was virtually no differentiation!

Note: For footnoted information, refer to slide 87. Index definitions are found on slide 88. Index returns are shown for illustrative purposes only. It is not possible to invest directly in an index. Forecasts are based on estimates and assumptions. There is no guarantee that they will be achieved. Past performance is not indicative of future results.
Multiple tools are now available to provide return, diversification, and stability to complement a broad investment portfolio...

Note: This slide depicts the performance since inception of the predecessor vehicles for flagship BlackRock Alternatives strategies which may be broadly marketed, and as such is a non-representative subset of the larger universe of strategies managed. This excludes funds that are too early to have meaningful performance. Past performance is not indicative of future results. Diversified infrastructure and Climate Infrastructure are predecessor funds. Long term private capital is open ended and represents current performance. Past performance is not indicative of future results.
Positioned to lead the industry in constructing whole portfolios across public and private markets on behalf of clients

**Whole Portfolio Multi–Alternatives Solutions**
Integrated view of underlying drivers of risk & return across public and private markets

**Access & Capital Markets**
Wide and deep industry footprint to source and underwrite transactions, and deliver outperformance

**Technology**
Aladdin and eFront deliver investment insights drawn from public and private markets data

**Partnership**
Grounded in solving client needs

**Evolving to drive better investment outcomes for clients**
- Deliver alpha generating private market investment strategies to clients at scale
- Leverage new structures and partnerships to provide alternatives to wealth clients
- Be the leading transition capital private markets provider
- Build whole portfolio client solutions
End notes

These notes refer to the financial metrics and/or defined term presented on:

**Slide 90 – BlackRock alternatives**

1. Client Assets figures as of 3/31/23. Client assets includes AUM and non–fee paying committed capital. Committed capital are non–fee paying and are not included in AUM. These commitments are expected to generate fees and will be counted in AUM and flows as the capital is deployed over time.
2. Represents last three years ending 12/31/22. Gross fundraising includes assets counted in net inflows and committed capital. Committed capital that earns fees during the commitment stage is included in net flows and AUM. 
   
   Fundraising data includes alternative solutions, hedge fund solutions, private equity solutions, opportunistic and private credit, Long Term Private Capital, real estate and infrastructure.
3. Represents last three years ending 3/31/23. Organic asset growth rate calculated by dividing net asset inflows over beginning of period assets.
4. Represents last three years ending 3/31/23. Organic base fee growth rate calculated by dividing net new base fees earned on net asset inflows by the base fee run–rate at the beginning of period.
5. Revenue includes base, securities lending and performance fees.
6. 3–year CAGR represents compounded annual growth rate for three years ending in 2022.
7. Private Markets represents illiquid alternatives.

**Slide 91 – We have designed a private markets platform that seeks to deliver outperformance and investment outcomes for clients**

Note: Client assets figures as of 3/31/23. Client assets includes AUM and non–fee paying committed capital.

**Slide 92 – Our Private Markets platform has delivered double digit growth in client assets and revenue**

**Slide 93 – Well positioned for future revenue growth**

1. Committed capital as of 3/31/23. Committed capital are non–fee paying and are not included in AUM. These commitments are expected to generate fees and will be counted in AUM and flows as the capital is deployed over time.
2. Based on fee rates as of 3/31/23. Past fee rates and future assumptions may not be indicative of future results. Future base fees expected to materialize as we deploy committed capital.
3. Reflects gross deferred carried interest liability as disclosed in BlackRock Form 10–Ks and 10–Q for the applicable time period.

**Slide 94 – Industry AUM is expanding as investors continue to increase allocations to private markets**

**Slide 95 – Our flagship franchises are steadily scaling**

2. Fund targets are not guaranteed and subject to change. Diversified and Climate Infrastructure funds I through III are closed.

**Slide 96 – Our differentiated deal flow in private markets is a key driver of performance and our value proposition to clients**

1. Differentiated deal flows refers to deal sourcing that is proprietary or part of a limited investor process.
3. Deal examples reflect recent, publicly known investments across H2 2022 and Q1 2023 correspondingly with the relevant BlackRock capability. Deal examples are not indicative of all sourced or funded deals.
Transition Investing: Unlocking new markets for clients

These notes refer to the financial metrics and/or defined term presented on:

Slide 101 – The transition to a low-carbon economy will transform economies, sectors, and business models...
2. BloombergNEF, Electric Vehicle Outlook 2022. This figure reflects the report’s Economic Transition Scenario.
3. BII, Rocky Mountain Institute, and European Commission, December 2022.

Slide 102 – and we expect the transition to spur significant capital investment

Slide 106 – Our $100B+ transition platform spans asset classes
1. Transition AUM: Private market funds and transition deals and public market portfolios whose principal strategy either through portfolio objective or investment selection focuses on preparing for, being aligned to, benefitting from and/or contributing to the transition to a low carbon economy. Some transition projects may be in funds that also invest in non-transition assets. Investments are made by BlackRock’s funds, and it is generally not possible to invest directly into a single project.

Slide 109 – BlackRock provides clients with access to global transition investment opportunities

...driving BlackRock stock outperformance over the long–term

Total return to shareholders¹

Note: For footnoted information, refer to slide 136.
BlackRock will continue to invest and leverage our scale to drive long-term shareholder value.
End notes

These notes refer to the financial metrics and/or defined term presented on:

Slide 121 – Successful execution of our financial framework
1. Organic asset growth rate is calculated by dividing net asset inflows over beginning of period assets. 5% reflects average over the 5–year period.
2. Organic base fee growth rate is calculated by dividing net new base fees earned on net asset inflows by the base fee run–rate at the beginning of the period. 5% reflects average over the 5–year period.
3. Beginning in the first quarter of 2022, the Company updated its definition of operating income, as adjusted, operating margin, as adjusted, and net income attributable to BlackRock, Inc., as adjusted, to include adjustments related to amortization of intangible assets, other acquisition–related costs, including compensation costs for nonrecurring retention–related deferred compensation, and contingent consideration fair value adjustments incurred in connection with certain acquisitions. For further information, please see pages 37–38 of our 2022 Form 10–K. 2017 results do not reflect updated definition for operating margin, as adjusted. The company estimates that for 2017, such adjustments primarily include amortization of intangible assets and acquisition–related compensation costs of $89 million and $20 million, respectively, and that the adjustments for acquisition–related transaction costs and contingent consideration fair value adjustments are not material.

Slide 122 – Organic asset growth higher and less volatile than peers

Slide 123 – Diversified platform supports 5% organic base fee growth target
1. Effective fee rate for 2022. Effective fee rate represents base fees and securities lending revenue earned on total average AUM. Total average AUM 2022 is calculated as the 13–point average of the month–end spot AUM amounts.
2. Organic base fee growth rate is calculated by dividing net new base fees earned on net asset inflows by the base fee run–rate at the beginning of the period. 3–year LTM average organic base fee growth represents average for trailing twelve months for 1Q21, 1Q22, and 1Q23.
3. Percentage revenue contribution for 2022 includes base fees, securities lending, performance fees and technology services revenue.
4. Includes all active strategies excluding illiquid alternative.
5. Represents Technology Services Revenue. 3–year average growth rate represents CAGR for the three years ending in 2022.

Slide 125 – Differentiated organic growth and margin over the long–term, with near–term results impacted by historic market headwinds
1. 2012 information reflects accounting guidance prior to the adoption of the new revenue recognition standard. For further information, refer to Note 2, Significant Accounting Policies, in the consolidated financial statements in our 2018 Form 10–K.

Slide 126 – Consistent capital management policy to invest first and then return cash to shareholders
1. Dividend and share repurchases from BlackRock’s Form 10–K for each applicable year.
2. Payout ratio equals (total dividends and share repurchases) / (GAAP net income).

Slide 127 – Using our balance sheet to support profitable growth
1. Revenues from products that have received seed or co–investments over $1M in 2009 through 2022. Revenue includes base and performance fees. Portfolio value for as of year–end for both time periods.
2. 2022 revenue includes ~$260M of future annual base fee from $33B of committed capital.
End notes

These notes refer to the financial metrics and/or defined term presented on:

**Slide 128 – Increasing co-investment portfolio as private markets scales, delivering revenue growth and profitability for shareholders**
1. Gross fundraising includes assets counted in net inflows and committed capital. Committed capital that earns fees during the commitment stage is included in NNB and AUM. Fundraising data includes alternative solutions, hedge fund solutions, private equity solutions, opportunistic and private credit, Long Term Private Capital, real estate and infrastructure.
2. Reflects gross deferred carried interest liability as disclosed in BlackRock form 10–Ks and 10–Q for the applicable time period.

**Slide 130 – Steady dividend increases**
1. 2003 dividend per share is annualized.

**Slide 131 – Share repurchase program since 2013**
1. Represents time period from 12/31/12 to 12/31/2022.

**Slide 132 – BlackRock has delivered differentiated organic base fee growth across various market environments**
1. Organic base fee growth rate is calculated by dividing net new base fees earned on net asset inflows by the base fee run–rate at the beginning of the period.
2. 2013 to 2015 information reflects accounting guidance prior to the adoption of the new revenue recognition standard. For further information, refer to Note 2, Significant Accounting Policies, in the consolidated financial statements in our 2018 Form 10–K.
3. 2018 to 2021 reflects recast financials for updated definition of operating income, as adjusted, operating margin, as adjusted, and net income attributable to BlackRock, Inc., as adjusted, to include adjustments related to amortization of intangible assets, other acquisition–related costs, including compensation costs for non–recurring retention–related deferred compensation, and contingent consideration fair value adjustments incurred in connection with certain acquisitions. For further information, please see pages 37–38 of our 2022 Form 10–K.

**Slide 133 – Driving BlackRock stock outperformance over the long–term**
2. Note: Large–Cap Traditional Peers refers to publicly traded large–cap asset managers (AB, AMG, BEN, IVZ and TROW).

Note: For additional information on the non-GAAP expense adjustments and explanations on the use of non-GAAP measures, see BlackRock’s Form 10-K for the applicable period.

1. 2012 to 2015 information reflects accounting guidance prior to the adoption of the new revenue recognition standard. For further information, refer to Note 2, Significant Accounting Policies, in the consolidated financial statements in our 2018 Form 10-K.

2. Beginning in the first quarter of 2022, the BlackRock updated its definition of operating income, as adjusted, operating margin, as adjusted, and net income attributable to BlackRock, Inc., as adjusted, to include adjustments related to amortization of intangible assets, other acquisition-related costs, including compensation costs for nonrecurring retention-related deferred compensation, and contingent consideration fair value adjustments incurred in connection with certain acquisitions. Information from 2018 to 2022 reflects updated definitions. 2012 to 2017 does not reflect updated definitions. For further information, please see pages 37–58 of our 2022 Form 10-K.

Performance notes

Past performance is not indicative of future results. Except as specified, the performance information shown is as of March 31, 2023 and is based on preliminary data available at that time. The performance data shown reflects information for all actively and passively managed equity and fixed income accounts, including U.S. registered investment companies, European–domiciled retail funds and separate accounts for which performance data is available, including performance data for high net worth accounts available as of February 28, 2023. The performance data does not include accounts terminated prior to March 31, 2023 and accounts for which data has not yet been verified. If such accounts had been included, the performance data provided may have substantially differed from that shown.

Performance comparisons shown are gross–of–fees for institutional and high net worth separate accounts, and net–of–fees for retail funds. The performance tracking shown for index accounts is based on gross–of–fees performance and includes all institutional accounts and all iShares® funds globally using an index strategy. AUM information is based on AUM available as of March 31, 2023 for each account or fund in the asset class shown without adjustment for overlapping management of the same account or fund. Fund performance reflects the reinvestment of dividends and distributions.

Performance shown is derived from applicable benchmarks or peer median information, as selected by BlackRock, Inc. Peer medians are based in part on data either from Lipper, Inc. or Morningstar, Inc. for each included product.
