Momenta Pharmaceuticals Announces Launch of Glatopa(TM) (glatiramer acetate injection), the First Substitutable Generic for COPAXONE(R) (glatiramer acetate injection) 20mg

First Commercial Sale to Trigger \$10 Million Milestone Payment to Momenta

CAMBRIDGE, Mass., June 18, 2015 (GLOBE NEWSWIRE) -- Momenta Pharmaceuticals, Inc. (Nasdaq:MNTA), today announced that Sandoz has initiated its U.S. launch of once daily Glatopa™ (glatiramer acetate injection), a generic equivalent of daily COPAXONE® 20 mg, developed under a collaboration agreement between Momenta and Sandoz. Glatopa is the first AP-rated substitutable generic indicated for the treatment of patients with relapsing-forms of multiple sclerosis (RRMS), a chronic disease of the central nervous system characterized by inflammation and neurodegeneration.

Under the terms of its collaboration agreement with Sandoz, Momenta will receive a \$10.0 million milestone payment upon first commercial sale. Momenta is also eligible to receive up to \$120 million in remaining milestone payments upon the achievement of certain U.S. commercial and sales-based milestones for the Glatopa product.

Glatopa was determined by the FDA to be therapeutically equivalent to daily COPAXONE 20 mg, with the same active ingredients, route of administration, strength and dosage form. Glatopa's high quality U.S.-based supply chain and manufacturing process meet rigid FDA standards, and Glatopa is fully substitutable at the pharmacy level.

Sandoz has also introduced a patient support service offering that includes financial support to eligible patients, personalized injection training and 24-hour access to nurses to answer non-clinical questions.

About Glatopa™

Once daily Glatopa (glatiramer acetate injection), developed in collaboration with Sandoz, is the first FDA-approved generic version of daily COPAXONE® 20 mg for patients with relapsing forms of multiple sclerosis. Produced entirely in the United States, once daily Glatopa has been determined by the FDA to be therapeutically equivalent to daily COPAXONE 20 mg, and is an "AP" rated, fully-substitutable product. As a therapeutically equivalent generic product, once daily Glatopa contains the same active ingredients, route of administration, strength, and dosage form, and can be substituted with the full expectation that Glatopa will produce the same clinical effect and safety profile as daily COPAXONE 20 mg. Daily COPAXONE 20 mg is one of the leading products marketed to treat multiple sclerosis, and is frequently prescribed as a first-line therapy in newly diagnosed patients.

About Momenta

Momenta Pharmaceuticals is a biotechnology company specializing in the detailed structural analysis of complex drugs and is headquartered in Cambridge, MA. Momenta is applying its technology to the development of generic versions of complex drugs, biosimilar and potentially interchangeable biologics, and to the discovery and development of novel therapeutics for oncology and autoimmune indications.
