## Use of Non-GAAP Financial Measures

### Product Margin

Global Partners views product margin as an important performance measure of the core profitability of its operations. The Partnership reviews product margin monthly for consistency and trend analysis. Global Partners defines product margin as product sales minus product costs. Product sales primarily include sales of unbranded and branded gasoline, distillates, residual oil, renewable fuels and crude oil, as well as convenience store sales, gasoline station rental income and revenue generated from logistics activities when the Partnership engages in the storage, transloading and shipment of products owned by others. Product costs include the cost of acquiring products and all associated costs including shipping and handling costs to bring such products to the point of sale as well as product costs related to convenience store items and costs associated with logistics activities. The Partnership also looks at product margin on a per unit basis (product margin divided by volume). Product margin is a non-GAAP financial measure used by management and external users of the Partnership's consolidated financial statements to assess its business. Product margin should not be considered an alternative to net income, operating income, cash flow from operations, or any other measure of financial performance presented in accordance with GAAP. In addition, product margin may not be comparable to product margin or a similarly titled measure of other companies.

### EBITDA and Adjusted EBITDA

EBITDA and Adjusted EBITDA are non-GAAP financial measures used as supplemental financial measures by management and may be used by external users of Global Partners' consolidated financial statements, such as investors, commercial banks and research analysts, to assess the Partnership's:

- compliance with certain financial covenants included in its debt agreements;
- financial performance without regard to financing methods, capital structure, income taxes or historical cost basis;
- ability to generate cash sufficient to pay interest on its indebtedness and to make distributions to its partners;
- operating performance and return on invested capital as compared to those of other companies in the wholesale, marketing, storing and distribution of refined petroleum products, gasoline blendstocks, renewable fuels, crude oil and propane, and in the gasoline stations and convenience stores business, without regard to financing methods and capital structure; and
- viability of acquisitions and capital expenditure projects and the overall rates of return of alternative investment opportunities.

Adjusted EBITDA is EBITDA further adjusted for gains or losses on the sale and disposition of assets and goodwill and long-lived asset impairment charges. EBITDA and Adjusted EBITDA should not be considered as alternatives to net income, operating income, cash flow from operating activities or any other measure of financial performance or liquidity presented in accordance with GAAP. EBITDA and Adjusted EBITDA exclude some, but not all, items that affect net income, and these measures may vary among other companies. Therefore, EBITDA and Adjusted EBITDA may not be comparable to similarly titled measures of other companies.

### Distributable Cash Flow

Distributable cash flow is an important non-GAAP financial measure for the Partnership's limited partners since it serves as an indicator of success in providing a cash return on their investment. Distributable cash flow as defined by the Partnership's partnership agreement is net income plus depreciation and amortization minus maintenance capital expenditures, as well as adjustments to eliminate items approved by the audit committee of the board of directors of the Partnership's general partner that are extraordinary or non-recurring in nature and that would otherwise increase distributable cash flow. Distributable cash flow as used in our partnership agreement also determines our ability to make cash distributions on our incentive distribution rights. The investment community also uses a distributable cash flow metric similar to the metric used in our partnership agreement with respect to publicly traded partnerships to indicate whether or not such partnerships have generated sufficient earnings on a current or historic level that can sustain distributions on preferred or common units or support an increase in quarterly cash distributions on common units. Our partnership agreement does not permit adjustments for certain non-cash items, such as net losses on the sale and disposition of assets and goodwill and long-lived asset impairment charges. Distributable cash flow should not be considered as an alternative to net income, operating income, cash flow from operations, or any other measure of financial performance presented in accordance with GAAP. In addition, distributable cash flow may not be comparable to distributable cash flow or similarly titled measures of other companies.

### Forward-Looking Statements

*Certain statements and information in this fact sheet may constitute "forward-looking statements." The words "believe," "expect," "anticipate," "plan," "intend," "foresee," "should," "would," "could" or other similar expressions are intended to identify forward-looking statements, which are generally not historical in nature, although not all forward-looking statements contain such identifying words. These forward-looking statements are based on Global's current expectations and beliefs concerning future developments and their potential effect on the Partnership. While management believes that these forward-looking statements are reasonable as and when made, there can be no assurance that future developments affecting the Partnership will be those that it anticipates. Forward-looking statements involve significant risks and uncertainties (some of which are beyond the Partnership's control) including, without limitation, the impact and duration of the COVID-19 pandemic, uncertainty around the timing of an economic recovery in the United States which will impact the demand for the products we sell and the services that we provide, uncertainty around the impact of the COVID-19 pandemic to our counterparties and our customers and their corresponding ability to perform their obligations and/or utilize the products we sell and/or services we provide, uncertainty around the impact and duration of federal, state and municipal regulations related to the COVID-19 pandemic, and assumptions that could cause actual results to differ materially from the Partnership's historical experience and present expectations or projections. For additional information regarding known material factors that could cause actual results to differ from the Partnership's projected results, please see Global's filings with the SEC, including its Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K. Readers are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date hereof. Global undertakes no obligation to publicly update or revise any forward-looking statements after the date they are made, whether as a result of new information, future events or otherwise.*
